## *Energy . . . in Demand*

The Quarterly Report on International Energy and Environmental Issues from Europe  
*Energy . . . in Demand* focuses on issues that shape energy demand  
— which, of course, includes many energy supply concerns.

The source is Europe. But the focus is on news with an impact outside Europe.

*Energy . . . in Demand* offers a special focus on the linkages between energy  
and the environment because many energy policies are being designed to meet  
environmental as well as energy objectives.

For information on subscribing, contact: *Energy . . . in Demand*
