Energy . . . in Demand

The Quarterly Report on International Energy and Environmental Issues from Europe

Energy . . . in Demand focuses on issues that shape energy demand — which, of course, includes many energy supply concerns.

The source is Europe. But the focus is on news with an impact outside Europe.

Energy . . . in Demand offers a special focus on the linkages between energy and the environment because many energy policies are being designed to meet environmental as well as energy objectives.

For information on subscribing, contact: *Energy . . . in Demand*
