Duncan Taylor In Memorium

The editors and board of *Energy Studies Review*, and the officers and members of the McMaster Institute for Energy Studies, mourn the passing of Duncan Taylor, who died October 16, 1994, while vacationing on the Island of Mauritius.

Duncan was a model civil servant and a keen observer of the Canadian and international energy scenes. At the time of his death, he was Director of the Economic Services Branch of the Ontario Ministry of Environment and Energy. He was a long-time member of the editorial board of *Energy Studies Review*, and he had worked closely with MIES as an advisor to its Energy Policy Research Program and as a participant in its workshops.

Duncan Taylor was a strong, colourful, and erudite man. He played a critical role in the development of this journal and in the Institute that publishes it. He will be remembered with great respect and affection.
